PROFESSIONAL SUMMARY

B.Tech Computer Science and Engineering student with an 8.91/10 CGPA, Python programming experience, and project exposure across Android applications, web platforms, computer vision, OCR, and automation. Completed a 15-day Python programming internship at the Centre for Railway Information Systems (CRIS), working on a CAPTCHA Reader using OpenCV and Tesseract OCR. Hackathon team leader and TEJAS India Hackathon Second Runner-Up. Interested in software development, Android, web/full-stack, Python, and entry-level AI/ML opportunities.

TECHNICAL SKILLS

Programming: C, Python; working knowledge of C++, Kotlin, and Java.

Data & Computer Vision: NumPy, Pandas, OpenCV, Tesseract OCR (pytesseract); PyTorch used in SmartWaste project work.

Web: HTML, CSS, JavaScript, React. **Mobile:** Android development with Kotlin and Java.

Databases: SQL fundamentals; local database functionality in Mussu. **AI Integration:** Google Gemini API, speech recognition, text-to-speech.

Core Concepts: Data Structures and Algorithms, Object-Oriented Programming, Python programming, image processing. **Currently learning:** Machine Learning fundamentals.

PROFESSIONAL EXPERIENCE

XpertIntern — Data Operations & Automation Intern | July 2026 – Present

- Support dataset management, certificate-generation workflows, customer-related operations, and repetitive-task automation.

EzyIntern — Operations & Automation Intern | April 2026 – June 2026

- Supported dataset management, customer communication, certificate generation, and process automation.

Centre for Railway Information Systems (CRIS) — Python Programming Intern | December 2025 – January 2026 (15 days)

- **CAPTCHA Reader:** Used Python, OpenCV, and Tesseract OCR (pytesseract) to process CAPTCHA images and extract text.

PROJECTS

Mussu — Android AI Voice Assistant | Kotlin, Java, Python, Google Gemini API

- Built a working Android APK with voice interaction, speech recognition, text-to-speech, and Gemini-generated responses; local database supports offline access to stored data.

SmartWaste 2.0 — AI-Based Waste Segregation | Python, OpenCV, PyTorch

- Worked on a waste-management project focused on image-based waste segregation and computer-vision workflows.

StudySaathi — Student Learning Platform | React, SQL

- Built a student-focused education platform using a React interface and SQL-related data functionality.

PaisaFlow — Fintech Project | Kotlin, Python, SQL

- Team leader for the TEJAS India Hackathon entry; contributed to Android APK development and backend work.

RailCast — Railway-Related Project | Kotlin, Python, SQL

- Developed a project demo/interface related to railway information and workflows; advanced functionality remains in development.

Plant Disease Detection | Additional project; details and technology stack to be verified from repository.

ACHIEVEMENTS & TECHNICAL ACTIVITIES

- **Second Runner-Up, TEJAS India Hackathon:** Team leader for PaisaFlow; contributed to Android APK and backend development.
- **First Place, College-Level Internal SIH Round.**
- Participated in HackOdisha, HackHazards, and other hackathons; additional certificate names can be added when confirmed.

EDUCATION

B.Tech, Computer Science and Engineering — Government Engineering College Sheikhpura, Bihar Engineering University (BEU) | Expected 2028 | CGPA: 8.91/10

Class XII (PCM) | 2024 | 85.2% **Class X** | 2022 | 92.2%
